Vestibular Therapists at WMCHealth’s Balance & Cochlear Implant Center to share their expertise at Hearing Loss Association of America Chapter Meeting

Saturday, April 20 • 12:30 p.m. - 2:30 p.m.
Irvington Public Library, 12 South Astor Street, Irvington, NY

The Connection Between Hearing Loss & Balance

According to a study conducted at Johns Hopkins University, people between the ages of 40 and 69 who have even mild hearing loss are three times more likely to become dizzy, lose their balance and fall, creating the risk for injury or death. The greater the hearing loss, the greater the risk of falling. Hear from three medical professionals at Westchester Medical Center’s Balance and Cochlear Implant Center about the risks and what you can do about them.
